MSPM-2 Pole Mounted Driver Feedback Speed Sign

Monitoring Speed for Traffic Safety

A Portable Speed Advisory Monitoring System built to withstand the harshest environments. The MSPM-2 can be easily set up or moved from location to location to assist in gaining voluntary Speed Limit Compliance. Its lightweight design & easy mounting allows for placement on various size poles or structures without special brackets or supports. Change the Speed Alert and Maximum Display Settings quickly, using the Wireless Radio Frequency Remote from a Safe Distance, without having to access the sign.
